## WETMORE SERVICE FOR TOURISTS AT BATCHER'S GARAGE

Automobile tourists passing through or visiting Phoenix can now avail themselves of "Wetmore Service" through the centrally located Batcher's Garage on North Second avenue, the only Wetmore station in Phoenix.

According to Batcher this service costs nothing. That is you get a service book free which entitles the holder to secure his gasoline and oil at a saving of 5 per cent. It is said that these service stations are established all along the national highway and the books are good at any station. One of the primary advantages of this service is that the Wetmore garage in each town is selected for its ability to render a high quality of service and because of its recognized mechanical department, central location, and the fact that it is always open.

Batcher in explaining this new service says that it is intended for visiting tourists only, but that it will not interfere with his regular quality service which he has been giving every day in the year.

## MOVIE LABORATORY IS FULL SIZED INDUSTRY

While the production of motion pictures by the Ford Motor company is only a side line, yet the studio and laboratory which produce the "Ford Educational Weekly" are among the country's finest and most completely equipped. Everything needed to convert raw film into finished pictures by expert motion picture men may be found there.

From this effectively organized picture producing plant, one hundred fifty some odd thousand feet of film weekly starts its long journey through the theaters of America, Mexico, Brazil, Chile, Argentina, South Africa, Spain, France, Russia, Scandinavia, Japan, China and Alaska. Each week 10,000,000 people see "The Ford Educational Weekly."

It is shown in 7000—nearly half—the moving picture theaters in the United States; and has gained for the Ford Motor company the distinction of having the largest circulation of motion pictures in the world.

A staff of camera men are employed continuously to provide pictures for the laboratory.

One of the most recent films portrays scenes from Henry Ford's life. It shows something of his early life on the farm, where he tinkered with machinery when his other work permitted, gives one a glimmering of his early mechanical genius, shows him

at work on the first car, and later shows all of the Ford industries in Detroit. The last scene, taken last fall, pictures Mr. and Mrs. Ford riding on their farm near Dearborn, Mich. In the first Ford car, which, incidentally is still in very good running condition.

### THE GOLDEN LAND

I think the sun can never shine,  
Upon a land that's more divine,  
A land that holds such magic wealth,  
Of golden treasure and buoyant health,  
As Arizona.

I think, perchance, when time shall cease,

And all men's troubles end in peace,  
That God, in looking o'er the earth,  
Shall find a place for heaven's new birth—  
In Arizona.
